

ARMENTA

New Year.... New World Look!

Introducing, the New World Rhodium Plating

With the new rhodium finish, the silver has a higher polish which contrasts nicely with the midnight oxidized silver. The long lasting rhodium finish brightens up the collection.

Armenta has added midnight oxidized silver pieces to New World, new styles in silver/midnight and all midnight. The midnight pieces can crossover into Old World.

Armenta will not longer make pieces in the old vintage silver finish of seasons past. You may send in your New World pieces in our old finish to be re-platted into the bright rhodium finish free of charge, as we want your collection to layer well together!

Armenta looks towards a bright future and we welcome any questions about our changes!
